SERVICES TO HEALTH

Analytical Reference Standards

The use of ethanol biomarkers such as Ethylglucuronide (EtG) and Ethylsulfate (EtS) has expanded greatly over the past few years. Both EtG and EtS are sensitive and specific biomarkers for alcohol consumption providing intermediate detection window between short and long term markers.

For EtG- and EtS-testing, LIPOMED provides native and deuterated reference standards supplied as calibrated solutions in methanol and in standard pack sizes of 10 mg, 50 mg and 100 mg.

For more information, please check our website **www.lipomed.com.**

Are you also looking for Aqueous Ethanol Standards?

- » Currently available from LIPOMED: NIST-traceable Ethanol standards supplied in concentrations ranging from 10 mg/dL to 700 mg/dL.
- » Available in 1.2 mL, 5 mL and 10 mL ampoules
- » Supplied as calibrated standard solutions in water.

Acetone
Ethanol
Isopropanol
Methanol

Alcohol Mixture 4

MIX-1808-0.1LH	0.1 mg /1 ml of each component	calibrated solution in water

Ordering & other information

LIPOMED is a private Swiss Health Care Company. We are one of the leading companies for Analytical Reference Standards worldwide and specialized in the research, development and manufacturing of ethical pharmaceuticals and products for the treatment of rare diseases.

Since 1993 LIPOMED is dedicated to providing products and services of outstanding quality and expertise. We have our own GMP/GDP and ISO 9001 certified pharmaceutical production facilities in Arlesheim, near Basel. We are also ISO/IEC 17025 accredited for testing of Analytical Reference Standards and ISO 17034 accredited for the production of Reference Material.

Our innovative products are marketed and distributed with offices and partners in more than 50 countries around the world.

LIPOMED's Analytical Reference Standards currently include the following classes of substances, their deuterated analogues and metabolites, such as Glucuronides and Sulfates:

- Alcohol & Ethanol Biomarkers
- Amphetamines & Sympathomimetic amines
- Antidepressants
- Antipsychotics
- Barbiturates
- Benzodiazepines
- Cannabinoids
- Cathinones
- Cocaines
- Custom Mixtures
- Hallucinogens
- Opioids
- Other CNS Depressants
- Steroids
- Vitamins
