Analytical Reference Standards

LIPOMED will be offering for its calibrated reference standard solutions, new labels* that can be easily transferred from the original LIPOMED ampoule to auto sampler vials.

This innovative label will support customers in providing a quick, safe and accurate identification of vials used to store LIPOMED calibrated reference standard solutions after original ampoules are opened.

The new transfer label is also in compliance with the Globally Harmonized System of Classification and Labeling of Chemicals (GHS) guidelines for additional safety.e information, please check our website **www.lipomed.com.**

* LIPOMED new transfer labels are already available for all our new products, new lots as well as for a large number of our most common reference standards. Since the relabeling process of our existing batches is currently in progress, you may still receive some ampoules with the old label.

» LIPOMED provides a comprehensive range of individual reference standards available as ready-to-use calibrated solutions.
» Larger standard pack sizes such as 10 mg, 50 mg and 100 mg are also available.

Ordering & other information

LIPOMED is a private Swiss Health Care Company. We are one of the leading companies for Analytical Reference Standards worldwide and specialized in the research, development and manufacturing of ethical pharmaceuticals and products for the treatment of rare diseases.

Since 1993 LIPOMED is dedicated to providing products and services of outstanding quality and expertise. We have our own GMP/GDP and ISO 9001 certified pharmaceutical production facilities in Arlesheim, near Basel. We are also ISO/IEC 17025 accredited for testing of Analytical Reference Standards and ISO 17034 accredited for the production of Reference Material.

Our innovative products are marketed and distributed with offices and partners in more than 50 countries around the world.

LIPOMED's Analytical Reference Standards currently include the following classes of substances, their deuterated analogues and metabolites, such as Glucuronides and Sulfates:

- Alcohol & Ethanol Biomarkers
- Amphetamines & Sympathomimetic amines
- Antidepressants
- Antipsychotics
- Barbiturates
- Benzodiazepines
- Cannabinoids
- Cathinones
- Cocaines
- Custom Mixtures
- Hallucinogens
- Opioids
- Other CNS Depressants
- Steroids
- Vitamins
